University of Ljubljana – MSCA Postdoctoral Fellowships

The University of Ljubljana offers an excellent hosting environment for Marie Skłodowska-Curie Postdoctoral Fellowships, including opportunities at the *European Centre of Excellence in Artificial Intelligence for Digital Humanities (AI4DH)*. Selected candidates benefit from a strong interdisciplinary research setting and comprehensive institutional support throughout the application process. Further information is available in at [this link](#).

- [STEM orientation in European higher education institutions: Analysis of Institutional Characteristics 2026](#)

The European Union faces a competitiveness challenge that places STEM education at the centre of strategic policymaking. As articulated in the recently launched STEM Education Strategic Plan, Europe's capacity to innovate and compete globally depends fundamentally on developing robust STEM talent pipelines while addressing persistent skills shortages that constrain economic growth and technological advancement. This imperative is amplified by the twin green and digital transitions, which McKinsey estimates will require reskilling approximately 12 million European workers (6.5% of the current workforce) to fully harness the productivity benefits of emerging technologies. Against this backdrop, the present study examines institutional characteristics associated with varying levels of STEM orientation across European higher education institutions (HEIs), providing evidence-based insights to inform policy interventions within the Union of Skills framework.
