Europe

September 2026

1. 7-9: [Environmental Intelligence 2026](#)

Venue: University of Exeter, Streatham Campus, Exeter, UK

2. 16-18: [PLATIAL '26: International Symposium on Platial Information Science](#)

Venue: Salzburg, Austria

3. 21-25: [EGI 2026](#)

Venue: Ghent, Belgium

October 2026

4. 6-8: [RDA 27th Plenary Meeting](#)

Venue: London, United Kingdom

5. 7-9: [Open Earth Monitor Global Workshop](#)

Venue: Barcelona, Spain

November 2026

6. 4-6: [Visualizing Climate 2026](#)

Venue: Bologna, Italy

February 2027

7. 09-12: [21st International Digital Curation Conference \(IDCC27\)](#)

Venue: Lisbon, Portugal

8. 16: [Twelfth International Congress on Information and Communication Technology](#)

Venue: America Square Conference Centre, London, UK

9. 22-25: [DOKORP](#)

Venue: TU Dortmund University, Dortmund, Germany

Asia

November 2026

10. 4-5: [Singapore Open Research Conference 2026](#): "AI and Open Research: Building Trust, Ensuring Security, Driving Impact,"

Venue: Nanyang Executive Centre, Nanyang Technological University, Singapore

Oceania

November 2026

11. 12: [Oceania and Asia Data Roundtable 6 event](#)

Venue: Online

North America

November 2026

12. 2-4: [FOSS4G NA 2026](#)

Venue: Sacramento, California, USA

13. 19-20: [American Geographical Society](#)

Venue: Schomburg Center for Research in Black Culture, New York City, USA

Africa

September 2026

14. 21-25: [AGSE 2026](#)

Venue: Kwame Nkrumah University of Science & Technology, Kumasi, Ghana, Africa

5. Webinars

- If you want to start learning how to use QGIS, there are some excellent free resources at <https://www.gislounge.com/free-ways-to-learn-qgis/>
- **8th ESA-ECMWF-EUMETSAT Joint Training in Atmospheric Composition**
 Start date: Oct. 19, 2026
 End date: Oct. 19, 2026
 Host: Aristotle University of Thessaloniki
 Organizer: EUMETSAT, ESA, ECMWF
 Format: Blended course
 Language: English
 Contact name: Edward Malina
 Contact email: eotraing@esa.int
 Link: <https://atmostraining2026.esa.int/>
- **International Autumn School on Satellite Data Analysis**
 Start date: Nov. 9, 2026
 End date: Nov. 13, 2026
 Host: Hellenic National Meteorological Services
 Organizer: EUMETSAT
 Format: Blended course
 Language: English
 Fees: No
 Contact name: Natasa Strelec Mahovic
 Contact email: training@eumetsat.int
 Link: <https://classroom.eumetsat.int/course/view.php?id=158>

7. Training programs

- GeoForAll educational materials have been transferred to our new web site. [GeoForAll educational inventory system, a place to search and share educational materials](#)

10. New Free and Open software, data, etc.

- [Sentinel-6B Altimetry NRT/STC Datasets Release](#)

NASA's Physical Oceanography Distributed Active Archive Center (PO.DAAC) has made an initial release of datasets from the [Sentinel-6B](#) radar altimeter mission, which aims to provide high-precision measurements of global sea-level that build upon the extensive record of observation from the previous Jason series of altimetry missions.

The datasets are described and discoverable via [Earthdata Search](#).

- [Global Space-based Stratospheric Aerosol Climatology Version 2.24 Now Available](#)

The Global Space-based Stratospheric Aerosol Climatology (GloSSAC) Version 2.24 collection has been released. This version extends the dataset coverage from January 1, 1979, to December 31, 2025, and includes several minor revisions. This release includes the Stratospheric Aerosol and Gas Experiment III on the International Space Station (SAGE III/ISS) version 6.0 and Optical Spectrograph and InfraRed Imager System (OSIRIS) version 7.4.

Referenced Dataset

[Global Space-based Stratospheric Aerosol Climatology Version 2.24](#)

- [GEDI Version 3 Data Products Released](#)

The Land Processes Distributed Active Archive Center (LP DAAC) has released Global Ecosystem Dynamics Investigation ([GEDI](#)) Version 3 Level 1B Geolocated Waveform Data, Level 2A Elevation and Height Metrics Data, and Level 2B Canopy Cover and Vertical Profile Metrics Data. The GEDI instrument aboard the International Space Station (ISS) is a full-waveform lidar instrument that produces detailed measurements of the three-dimensional structure of Earth's surface.

This release includes data acquisitions from April 4, 2019, to March 16, 2023, and from April 26, 2024, to July 10, 2025. No data were collected while the [GEDI mission was paused](#) from March 17, 2023, to April 25, 2024. Newer GEDI acquisitions will be made available in upcoming releases.

[GEDI L1B Geolocated Waveform Data Global Footprint Level V003](#)

11. Free books, educational materials, etc.

- Visit the YouTube QGIS channel at <https://www.youtube.com/@qgishome> to get videos of QGIS applications, presentations and ideas.

- **How Data need people**, by Götz Hoeppe, Cambridge University Press, 2026

A new open access publication examining the human and social dimensions of data-intensive research offers valuable perspectives for the Research Data Alliance community and those working across open science, data stewardship, and collaborative research environments.

Published by Cambridge University Press, *How Data Need People – The Social and Epistemic Practice of a Data-Rich Science* by Götz Hoeppe examines how scientific data functions not only as information, but also as part of broader social, epistemic, and collaborative practices within research environments.

17. Ideas / Information

1. If you are interested in educational material, then go to <https://www.osgeo.org/initiatives/geo-for-all/in-your-classroom/> where you can find software resources for your classroom. Also, go to “Resources” <https://www.osgeo.org/resources/> to get guidance on how to use open source projects and tools.

2. UNESCO Launches New Open Science Platform

UNESCO has just launched the UNESCO Open Science Platform, unveiled during **UN Open Source Week 2026** in New York. Developed as free and open-source software, the platform brings together research outputs from UNESCO's major science programmes, awards, and fellowship initiatives, providing access through an InvenioRDM-powered repository with rich metadata, open access information, and research impact indicators.

In addition to offering access to research publications, the platform features curated highlights and plain-language summaries designed to make research more accessible to policymakers and broader audiences. It also includes an interactive dashboard tracking progress on the implementation of the UNESCO Recommendation on Open Science across UNESCO Member States, using data from UNESCO's first global consultation. The platform reflects many of the principles valued by the RDA community, including openness, discoverability, accessibility and the responsible sharing and reuse of research outputs.

Visit the **UNESCO Open Science Platform** to learn more and access the platform.

3. RDA Organisational Member Data Observatory Opens its Catalog of 1000 Datasets to boost research and innovation.

By Marco Zecchetto, RDA News, July 3, 2026

With the goal of addressing information fragmentation and consolidating a national node to strengthen evidence-based decision-making, applied research, innovation, and the development of artificial intelligence (AI), Data Observatory (DO) launched a platform featuring an open catalog that brings together 1,017 datasets from various institutions with nationwide scope.

[The DO catalog](#) — a public-private technology center focused on open data, bringing together the Ministries of Science and Economy, Amazon Web Services, and Universidad Adolfo Ibáñez — is aimed at researchers, academics, public institutions, companies, developers, journalists, and civil society. Data Observatory's Executive Director, Rodrigo Roa, explained that the initiative seeks to facilitate access to, organization, discovery, and reuse of information through international standards such as FAIR, which promotes data that are Findable, Accessible, Interoperable, and Reusable, and DataCite, which is designed to strengthen data documentation, traceability, and citation practices.

The platform covers data across six areas — natural and exact sciences, engineering and technology, medical and health sciences, agricultural sciences, social sciences, and humanities — and currently integrates information from the National Statistics Institute (INE); the Judiciary; the Ministries of Health, Energy, and Environment; the Hydrographic and Oceanographic Service of the Chilean Navy; the Chilean Copper Commission (Cochilco); the Office of Agricultural Studies and Policies (Odepa); the National Forestry Corporation (Conaf); and the Electoral Service (Servel).

“The primary sources we currently have are all national. This is a long-term project that primarily seeks to begin structuring and raising awareness about rapid, optimized, and efficient access to information. This is not just another repository; it is scientific infrastructure that positions us on the global stage,” said Roa.

Potential

Roa explained that the platform operates as “a Google-like search engine, but with enriched metadata,” meaning additional information about the origin, license, date, and citation format of each dataset. The catalog includes databases ranging from vehicle registration permits, pensions, healthcare facilities, and hospital discharge records to disability statistics, among many others.

He highlighted the importance of having high-quality data infrastructure — that is, data that are “well-documented, accessible, traceable, and interoperable” — and stated that the catalog’s potential lies in its ability to contribute to scientific development, public policy, digital services, and artificial intelligence that is “relevant” to the national context.

“Chile produces valuable data in areas such as astronomy, the environment, health, energy, agriculture, biodiversity, justice, economics, territorial development, and social phenomena. The challenge is ensuring that these data can be found, connected, and reused,” Roa noted.

He also explained that DO does not directly host the data but instead connects to the original sources through Application Programming Interfaces (APIs).

4. YouthMappers Academy

The YouthMappers Academy is an online learning platform designed to equip students, educators, and volunteers with the foundational and advanced skills needed to thrive in the open mapping ecosystem. Whether you're just beginning your journey with OpenStreetMap (OSM) or seeking to deepen your expertise, our curated modules support learning at every level.

Originally developed to support members of the global YouthMappers network, the Academy now serves a broader audience across the open mapping community. The content spans essential topics—from understanding the OSM ecosystem and using tools like iD Editor and JOSM, to exploring data management, field survey design, and gender considerations in mapping.

These self-paced modules are designed not only to build practical skills but also to inspire critical thinking and community engagement around open geospatial data. Whether you’re contributing to humanitarian efforts, supporting research, or strengthening your local mapping chapter, the YouthMappers Academy is your gateway to impactful learning and meaningful action.
