**The Sixth African Higher Education Week and RUFORUM Biennial Conference 2018.**

20 Ministers of Higher Education, over 30 senior government officials and experts, 105 Vice Chancellors met at the Sixth African Higher Education Week and RUFORUM Biennial Conference from 22-26 October, 2018, in Nairobi, Kenya. The Conference was organized under the overall theme of “Aligning African Universities to accelerate attainment of Africa’s Agenda 2063”. The Government of Kenya through its Ministry of Education and nine RUFORUM member universities in Kenya were the lead organizers of the Conference.

I thank the Government of Kenya and RUFORUM for inviting me to deliver a keynote at this important conference on the topic of “Harnessing the digital potential to drive higher education transformation in Africa”. Geospatial science plays an important role in agricultural systems, specifically in realizing United Nation’s Sustainable Development Goal to ‘End hunger, achieve food security and improved nutrition and promote sustainable agriculture’.

4. Conferences

**Europe**

**May 2019**

1. 19-22 May: 16th International Conference on Information Systems for Crisis Response and Management (ISCRAM 2019)
   Venue: Valencia, Spain

2. 29-30 May: Free GIS Days
   Venue: Girona, Spain.
   Open to new Proposals and workshops

**June 2019**

3. 10-14 June: ISPRS Geospatial Week 2019
   Venue: University of Twente, Enschede, The Netherlands

**July 2019**

4. 1-4 July: 29th EARSel Symposium 2019
   Venue: Salzburg, Austria

**August 2019**

5. 26-30 August: FOSS4G Bucharest 2019
   Venue: Bucharest, Romania

**September 2019**

6. 19-20 September: Hot Summit 2019
   Venue: Heidelberg, Germany

7. 21-23 September: State of the Map
   Venue: Neuenheimer Feld campus, Chemistry lecture hall building, Heidelberg, Germany

**North and Central America and the Caribbean**

**April 2019**

   Venue: International Conference Center of Havana, Cuba
   Abstracts Deadline: January 20, 2019

9. 2-4 April: RDA 13th (P13) Plenary Meeting
   Venue: Loews Hotel - Philadelphia, Pennsylvania, USA

10. 3-7 April: AAG Annual Meeting
    Venue: Washington, DC, USA.

11. 15-18: FOSS4G NA
    Venue: San Diego, California, USA

**June 2019**

12. 10 June: GeoEd ’19
    Venue: Jefferson Community and Technical College, Louisville, Kentucky, USA.

**South America**

**July 2019**

13. 1-5 July: XVII Biennial The International Association for the Study of the Commons (IASC) Conference
    Venue: Lima, Peru.

**Africa**

**April – May 2019**

14. April 30 – May 3: ICT4D
    Venue: SPEKE RESORT MUNYONYO, Wavamunno Road, Kampala, Uganda

**Asia**

**July 2019**

15. 15-20 July: 29th International Cartographic Conference (ICC2019)
    Venue: Tokyo, Japan.

**Oceania**

**September 2019**

16. 18-21 September: 15th International Conference on GeoComputation 2019
    Venue: Queenstown, New Zealand
5. Webinars

- An announcement from gvSIG team

For the fourth year running, we launch the gvSIG Festival, the online conference in which anyone in the world with an Internet connection can attend or participate as a speaker. The event will be held on March 27th and 28th 2019.

This year we want to make a special appeal to the group of women who are part of the gvSIG Community. We would like that a large percentage of the presentations of this 4th Festival are given by you, so we encourage you to present your proposals.

In the gvSIG project, we have always wanted to work and contribute our bit in the fight against gender discrimination. In internal debates we have always taken into account that within a movement such as open source software, and the values associated to it, the obvious absence of women should be worrying. And maybe it's the biggest problem. That should be worrying, and it is not.

The sector of open source geomatics, and gvSIG, do not escape these dynamics either. Even significant progress, there's an obvious absence of women in our collective. And the worst thing, we not only find that there are only a few initiatives that allow to create spaces to favour their integration, but it seems that it is not necessary.

And even if it's only a little that we can contribute, we would like to start working on this small step to help to reverse this situation. gvSIG festivals are open to any presentation related to the project, from anywhere in the world and in any language. From now on, we start the path to the next ‘4th gvSIG Festival’.

The information about the proposals submission can be found on the event website: [http://www.gvsig.com/festival](http://www.gvsig.com/festival)

---

7. Training programs

- GeoForAll educational materials have been transferred to our new web site. GeoForAll educational inventory system, a place to search and share educational materials

- Free course GIS for Archaeologists. “It is not necessary to register anywhere. The course is online and can be followed from anywhere in the world. The course will be available in English and Spanish. Each week we will publish a post on this blog that will contain a video-tutorial with exercises and access to the course data. Therefore, you only need to follow the video-tutorials to complete the course.

- 5-day immersion workshop held at Yale University, New Haven, CT, USA.
  Geo-Computation and Environmental Analysis Workshop (May 13th-17th, 2019)
  More info at [https://research.computing.yale.edu/training/geo-computation-bootcamps/geo-computation-and-environmental-analysis-workshop](https://research.computing.yale.edu/training/geo-computation-bootcamps/geo-computation-and-environmental-analysis-workshop)

- 5th International Summer School held at the Univ. of Basilicata, in the magnificent town Matera, Italy.
  Geocomputation using free and Open Source Software (3th-7th June 2019)
  More info at [www.spatial-ecology.net](http://www.spatial-ecology.net)

Students will be guided through the use of a command line interface using advanced open source data processing routines for geocomputation in Linux environment.

WGS: World Geodetic System
WISERD: Wales Institute of Social & Economic Research, Data & Methods
WMO: World Meteorological Organization
WMS: Web Map Service
WMTS: Web Map Tiles Services
WOIS: Water Observation Information System
WPS: Web Processing Service
15. Awards

OSGeo is pleased to announce the 2018 Google Code-in Grand Prize winners, who each receive a free trip to Google headquarters in California, along with a parent/guardian, are students (note that these are the student’s account names, due to privacy concerns):

- Mattoopackoo
- ShubhamSharama

OSGeo’s Google Code-in finalists (who receive Google hoodies) are:

- Armaan
- Flash
- Shivam Rai
- SunveerSingh

See here: https://codein.withgoogle.com/winners/#winners
the winners from all organisations

17. Ideas / Information

1. To post your FOSS4G educational information go to http://www.osgeo.org/education. There you can find more educational activities posted by members of our community.

FOSS4G is the annual global event of the Open Source Geospatial Foundation. It is the largest technical geospatial Open Source conference in the world. The FOSS4G conference focuses on Free and Open Source Software for Geospatial applications. In addition to high level technical talks four key domain are discussed every year to showcase the connection between free and open source software and communities from neighbouring domains.

2. The third edition of the EU Datathon has been officially launched on 28 January 2019 by the Publications Office of the European Union, in partnership with the Romanian Presidency of the Council of the European Union.

The EU Datathon is an event growing in popularity aiming to further stimulate the use of open data issued by the European Union. It allows competitors to showcase their data skills and innovative ideas. Furthermore, it offers them the opportunity to network and gather support in order to continue developing their ideas after the competition.

The challenges

Participants are invited to develop apps and interactive visualisations offering new services or public information insights to citizens, public authorities, and businesses. They have to use at least one dataset made available by the EU Institutions, Agencies, and other bodes and combine it with at least one dataset of the competition’s partners. The participating teams can compete with their apps in one horizontal or two thematic challenges.

Challenge 1: ‘Innovative ideas through EU open data’
Challenge 2: ‘New insights into economics and finance’
Challenge 3: ‘Tackling climate change’

The prizes

The competition is supported by the European Parliament’s Preparatory Action “Linked Open Data in the European Public Administration” and the European Commission ISA² programme (Interoperability solutions for public administrations, businesses and citizen). Joining the 2019 competition gives the opportunity to win one of the cash prizes in each challenge.
1st prize EUR 15,000
2nd prize EUR 7,000
3rd prize EUR 3,000

The competition will culminate with the final conference in Brussels on 13 June 2019, where finalists will present their projects in front of an expert jury and the open data community.

3. Building on the Africa Regional Data Cube and the Digital Earth Australia program, developed by Geoscience Australia, Digital Earth Africa will use data cube technology to translate over 30 years of Earth observation satellite imagery into information and insights on the changing African landscape and coastline.

Digital Earth Africa will use Open Data Cube technology that underpins Digital Earth Australia and the Africa Regional Data Cube. The Open Data Cube (ODC) is a global initiative to increase the value and use of satellite data by providing users with access to free and open data management technologies and analysis platforms. Details at http://www.ga.gov.au/digitlearthafrica

4. The GeoTech Center is pleased to announce the 2019 Undergraduate Geospatial Technology Skills Competition! The intent of the competition is to showcase the geospatial technology skills of U.S. undergraduate students. Competing students will create a project that utilizes geospatial technology to address a real-world problem. The student will then present the project and the resulting deliverables as a Poster that not only highlights their use of geospatial technology, but also demonstrates their communication and presentation skills.

The competition is software neutral. There will also be a prize for the best Open Source GIS project given by the Open Source Geospatial Foundation.

Applicants must meet all of the requirements below to qualify for the competition (questions regarding eligibility can be directed to Tom Mueller (Mueller@calu.edu):

- Applicants must be the age of 18 or older;
- Applicants must be enrolled during the Fall 2018 term in a geospatial technology course (e.g., geographic information systems, remote sensing, GPS/GNSS, etc.) or geospatial technology program at an accredited 2-year or 4-year U.S. institution (undergraduate status);
- Applicants must reside in the U.S.;
- All work and cartographic output must be the original work of the applicant;
- Only one entry allowed per student; and
- Only individual student submissions allowed (no group projects).

5. From Margherita Di Leo on behalf of OSGeo GSoC admins,

Dear OSGeo community,

We’re pleased to announce that OSGeo has been selected as an umbrella organisation for Google Summer of Code (GSoC) 2019. @Mentors:

In the coming days, we admins will be inviting the mentors that have filled the form [1]. If you want to
be a mentor and haven’t filled the form yet, please do it *ASAP*.

@All members of the community:

Be prepared and responsive in the coming days to welcome students and answer their inquiries. From Google admins: “Students who engage with their organization early (and often) are more likely to be accepted and then succeed. We encourage you to get to know the students and help them get to know you! Please continue to flesh out your ideas lists and documentation over the next few weeks.” Please, forward this email to your developer and community mailing list.

@Students:

According to the official timeline [2], student application period will be March 25, 2019 - April 9, 2019.

For your convenience, this year you can also download the proposal template from [3]. After filling the template and detailing the proposal, it must be submitted following the guidelines given by Google.

Remember to submit your proposal well in advance, so that you can make the most out of the feedback from mentors and the community at large and refine your proposal until the final deadline. Read the application instructions here [4]. The same page contains all the info you need before taking action, read it all carefully! Good luck everyone!

We admins will be available as always at <gsoc-admin at osgeo.org>, however, consider using public channels if the topic is not sensitive, i.e. soc mailing list [5].

GSoC [6] is a global program by Google aiming at bringing new developers to open source organizations. OSGeo’s participation as an umbrella organization dates back to the 2007 edition. Curious to know more? Browse our wiki pages [7].
