1. Activities of the Network

- Ottawa, Ontario, OSGeo Meetup Group meets on the third Thursday of each month. If you are located in the area, go to the link to sign up to the group and get updates about future events. ([http://www.meetup.com/OttawaOSGeo/](http://www.meetup.com/OttawaOSGeo/))

4. Conferences

Europe

October 2019

1. 8-9 October: 1st International Workshop on Legal and Ethical Issues in Crowdsourced Geographic Information
   Venue: University of Zurich, Zurich, Switzerland

   Venue: Epicenter venue, Helsinki, Finland

   Venue: San Francisco Cultural Complex, San Francisco Round s / n, CÁCERES, Spain

4. 24-26 October: 14th International gvSIG Conference
   Venue: School of Engineering in Geodesy, Cartography and Surveying, Universitat Politècnica de València, Spain.

November 2019

   "INOVATIVE GEOGRAPHIES: Mapping and Modeling our World"
   Venue: National Technical University of Athens, Athens, Greece

6. 14-16 November: XI Conference of users of R (in Spanish)
   Venue: REPSOL Auditorium and UNED Faculty of Education, Madrid, Spain

May 2020

7. 12-15 May: INSPIRE Conference 2020
   Venue: Dubrovnik, Croatia
## Editorial Board

Please refer to the appropriate person according to the following table:

October 2019

8. 25 October: QGIS Meeting in Chattanooga, Tennessee
Venue: Chattanooga State Technical College, Chattanooga, Tennessee, USA

December 2019

9. 9-13 December: AGU Meeting
Venue: San Francisco, California, USA

Africa

November 2019

10. 18-19 November: VizAfrica 2019 Data Visualization Symposium
Venue: University of Botswana Gaborone, Botswana
Deadline for proposals is Monday 19 August:
https://vizafrica.codata.org/2019-Botswana/submit/

Asia

October 2019

11. 23-25 October: Turkish National GIS Congress 2019
Venue: Ankara, Turkey

November 2019

12. 18-21 November: Eighth International Conference on Agricultural Statistics (ICAS VIII)
Venue: ICAR-Indian Agricultural Statistics Research Institute, New Delhi, India

Oceania

November 2019

13. 4-9 November: GEO Week and GEI Ministerial Summit
Venue: Canberra, Australia

14. 12-15 November: FOSS4G SotM Oceania 2019
Venue: Rutherford House, Victoria University, Wellington, New Zealand

5. Webinars

• Using the UN Biodiversity Lab to Support Biodiversity Monitoring & Reporting
Spatial data are available for your country through the UN Biodiversity Lab [1] on trends such as the rate of forest loss between 2000-2017 and protected area coverage of key biodiversity areas. You can also access maps that can help you understand where to take actions, such as those that safeguard ecosystem services and carbon stores in the environment. Would you like to learn how to use the UN Biodiversity Lab Status Maps [2] to support biodiversity monitoring and reporting?

Watch the webinar recording at https://youtu.be/Bo2WiIWtQ9s

[1] https://unbiodiversitylab.org

• Big Data, Modeling, and Simulation in Urban Sustainability
Register Now

Data, modeling, and simulations are critical to planning for and maintaining sustainable communities. The National Academies organized a workshop and webcast in January 2019 that brought together an interdisciplinary network of practitioners, business leaders, academics, and policy makers using data for urban sustainability. Building off the success of the workshop, National Academies are excited to announce an upcoming webinar series in October 2019 where invited speakers will delve further into four important topic areas that emerged during the January workshop.
Webinar Topics:

- Theoretical Approaches to Urban Planning
  Tuesday, October 8, 2019 from 4-5pm ET
- Exploring New Data Sources and Investigating Privacy Issues
  Tuesday, October 15, 2019 from 4-5pm ET
- Spatial-Temporal Modeling for Urban Analytics
  Wednesday, October 23, 2019 from 4-5pm ET
- The Power and Limitations of Urban Analytics in Supporting Cities
  Wednesday, October 30, 2019 from 4-5pm ET

7. Training programs

- GeoForAll educational materials have been transferred to our new web site. [GeoForAll educational inventory system, a place to search and share educational materials](https://www.ictp-saifr.org/sis/datasci2019.php)
- The CODATA-RDA Research Data Science school. December 2-13, 2019, Jan Jose, Costa Rica. This school will provide early career researchers (at MSc-level to 3 years after their PhD) from the Latin American Region with the necessary set of foundational data science skills to enable them to analyze their data in an efficient and effective manner for the 21st century.
  
  Description:
  The material covered here is fundamental to all areas of data science and hence open to researchers and professionals from all disciplines that deal with significant amounts of research data. The goal is to provide a practical introduction to these topics with extensive labs and seminars.

  Topics:
  - Open Science
  - Introduction to Unix Shell
  - Programming for Analysis
  - Git
  - Research Data Management
  - Author Carpentry
  - Data Visualization
  - Information Security
  - Machine Learning
  - Computational Infrastructures

  Online application:

- University of Pretoria – Department of Information Science in collaboration with DIRISA, SADiLaR and NeDICC
  
  Duration: 13–24 January 2020
  Location: Pretoria, South Africa
  The school provides early career researchers (M-level to postdoc) with the foundational data science skills, which include technical skills and responsible research practices, to enable them to work with their data in an effective and efficient manner required by 21st-century research.

  Description:
  The material covered by the programme is fundamental to all areas of research, and thus open to researchers and professionals from all disciplines that deal with significant amounts of research data. The goal is to provide a practical introduction to these topics with some theory and extensive hands-on training.

  Topics:
  - Open Science
  - Introduction to Unix Shell
  - Introduction to Git
  - Open and Collaborative Research
  - Research Data Management
  - Data Cleaning – using Open Refine
  - Data Analysis and Visualisation – using R
  - Data Intensive Social Science
  - Author Carpentry
  - Information Security
  - Machine Learning and Neural Networks
  - Research Computational Infrastructure

  Costs:
  The school is heavily sponsored. Successful applicants will be expected to pay a fee of R1 150 once the application is accepted. This fee includes all training and catering (lunches). Applicants are responsible for their own travel and accommodation arrangements.
How to Apply:
Application deadline: 15 October 2019

- Two weeks Summer School training from 11th-15th November 2019 on Data Science/Visualization at the University of Botswana Gaborone, Botswana, as part of the Symposium VizAfrica 2019.

10. New free and open software, data, etc.

- landscapemetrics: an open-source R tool to calculate landscape metrics

11. Free books, educational materials, etc.

- Live stream for the keynote/plenary parts of the third workshop (https://gsi.cigi.illinois.edu/workshop3/agenda/) of the NSF Geospatial Software Institute conceptualization project (http://gsi.cigi.illinois.edu/).
- The videos of this year’s FOSS4G Conference in Bucharest are now available in the AV-Portal of TIB via this link: https://av.tib.eu/series/685 All videos are assigned a digital object identifier (DOI) and a media fragment identifier. This allows to cite videos as a whole or single segments separately.
  The videos of all FOSS4G Conferences in the AV-Portal are available here: http://tib.eu/osgeo

12. Articles

Acronyms

by Nikos Lambrinos, Chief Editor, and Michael Finn.

For those who would like to support this effort, please send any acronyms to the Chief Editor (labrinos@eled.auth.gr).

• landscapemetrics: an open-source R tool to calculate landscape metrics

Quantifying landscape characteristics and linking them to ecological processes is one of the central goals of landscape ecology. Landscape metrics are a widely used tool for the analysis of patch-based, discrete land-cover classes. Existing software to calculate landscape metrics have several constraints, such as being limited to a single platform, not being open-source, or involving a complicated integration into large workflows. We present landscapemetrics, an open-source R package that overcomes many constraints of existing landscape metric software. The package includes an extensive collection of commonly-used landscape metrics in a tidy workflow. To facilitate the integration into large workflows, landscapemetrics is based on a well-established spatial framework in R. This allows pre-processing of land-cover maps or further statistical analysis without importing and exporting the data from and to different software environments. Additionally, the package provides many utility functions to visualize, extract, and sample landscape metrics. Lastly, we provide building-blocks to motivate the development and integration of new metrics in the future. We demonstrate the usage and advantages of landscapemetrics by analysing the influence of different sampling schemes on the estimation of landscape metrics. In so doing, we demonstrate the many advantages of the package, especially its easy integration into large workflows. These new developments should help with the integration of landscape analysis in ecological research, given that ecologists are increasingly using R for the statistical analysis, modelling, and visualization of spatial data.

17. Ideas / Information

1. To post your FOSS4G educational information go to [http://www.osgeo.org/education](http://www.osgeo.org/education). There you can find more educational activities posted by members of our community.

FOSS4G is the annual global event of the Open Source Geospatial Foundation. It is the largest technical geospatial Open Source conference in the world. The FOSS4G conference focuses on Free and Open Source Software for Geospatial applications. In addition to high level technical talks four key domain are discussed every year to showcase the connection between free and open source software and communities from neighbouring domains.

2. Join the GEO Week 2019 and the GEO Ministerial Summit in Canberra, Australia (4-9th Nov 2019). Canberra means ‘meeting place’ in Ngunnawal, the local indigenous language. Recognizing the history of the land and its traditional custodians, GEO Week will bring together diverse people and cultures to support and sustain our planet and communities. Go to “Conferences” for more details.

3. From Kiringai Kamau (kiringai.kamau@godan.info), GODAN Africa Lead, The Global Open Data for Agriculture and Nutrition (GODAN)

The challenge in Africa is not just learning the use of ICTs and GIS tools alone, but even maintaining traction with the foundational courses like Agriculture or veterinary as an extension and hence the creation of champion farmers from which others can learn is a challenge. We have therefore, jointly with partners like CTA, Wageningen UR, and GODAN, decided to create rural Hubs where integrating ICTs, Data, and Agriculture all happen at the same time. We encourage you to visit us when you have the opportunity to do so to learn more from what we are doing.

Since the extension is a challenge, we are using students who will be domiciled in our Hubs to practice what they learn experientially and extend the knowledge to farmers as they also collect data that we then use to drive technology-based innovations. It is for this reason that we have partnered with RCMRD/AfriGEO and now mooting collaboration with Digital Earth Africa, to promote GIS-anchored solutions development. We shall, therefore, need support in diverse ways which Suchith well captured in his introduction.

This December, RUFORUM will hold their continental forum in Accra, Ghana, and want to listen to what we are doing and proposing universities to do. We would like to go there with some case studies that we are discussing with RCMRD and some of the universities that we are working with.

We also have another forum on Geospatial Data and Internet Conference in October that we invite you to join in and explore how we can support many of the African Countries that shall be participating in this conference.

4. The [American Geographical Society (AGS) EthicalGEO Initiative](https://www.ethicalgeo.org) seeks to activate thinkers, innovators, entrepreneurs, policymakers, practitioners, students, and everyday citizens and bring them in to a global dialog that shines a light on their best ideas about the ethical challenges and opportunities posed by the many geospatial technologies and data sources that are reshaping our society. Just as the EthicalAI dialog has enabled a broad-based discussion about the future implications of AI, and the ways in which our society might steer the technology to our purposes, the EthicalGEO initiative seeks to spur a similar conversation around the flurry of geospatial innovations that have become part of our daily lives. Fellowship opportunities available to those in North America only at this time.

5. University of Colorado – College of Liberal Arts & Sciences

Assistant Professor position

The University of Colorado Denver I Anschutz Medical Campus seeks individuals with demonstrated commitment to creating an inclusive learning and working environment. We value the ability to engage effectively with students, faculty and staff of diverse backgrounds.

The Department of Geography and Environmental Sciences (GES) at the University of Colorado Denver
(CU Denver) invites applications for a tenure-track appointment at the Assistant Professor level in the area of Human-Environment Interactions to begin in August 2020. We seek a Human Geographer focused on environment-society topics such as energy and resources, environmental justice, food and agriculture, natural hazards, social vulnerability, urbanization and development, and/or water resources. Candidates should demonstrate rigorous and innovative theoretical, methodological and public engagement/communication components to their social science research. We also seek candidates committed to excellent teaching and mentoring at the undergraduate and graduate levels.

Assistant Professor – 17211
Assistant Professor
https://cu.taleo.net/careersection/2/jobdetail.ftl

The candidate will be expected to teach four courses (2/2) per academic year that may include undergraduate classes such as Environment, Society and Sustainability and Introduction to Human Geography as well as advanced undergraduate and graduate courses in their area of specialization. Candidates must have a PhD in geography or related discipline at the time of appointment and maintain an active research program that yields publications and external grant submissions.

6. Assistant Professor Position in Spatial Data Science

Target Date for Applications: 15 October 2019

Position Description: The Department of Geography at the University of Colorado Boulder invites applications for an Assistant Professor level tenure-track position in Geographic Information Science (GIScience) with specific focus on environmental or social applications of Spatial Data Science, beginning in August 2020.

We seek candidates whose work advances the frontiers of spatiotemporal analytics and geographic data science in creative and novel ways to drive emerging questions involving change and dynamics, and in the interplay between human and environmental systems, as related to natural hazards or climate, natural or human resources, public health, demography, urbanization, or other questions at the nexus of human-natural dimensions of environmental change. The successful candidate has a strong foundation in GIScience, current and emerging methods in statistics, data science, and/or machine learning, and can demonstrate a commitment to interdisciplinary research in and beyond the geographical sciences.

As part of the normal three courses per year teaching expectation, the successful candidate will rotate regularly into three existing courses: Introductory GIScience, Basic Statistics and Advanced Quantitative Methods at least every other year. The candidate will teach an upper division elective in spatiotemporal analysis for undergraduate and graduate students. The candidate will also regularly teach a graduate level seminar on a research topic of their choosing and congruent with student demand and department needs. There is also the potential to align teaching with an interdisciplinary professional certificate / degree in Earth Data Analytics blending data science and Earth systems knowledge, which is run through Earth Lab.

This is a full-time, nine-month position. Research and service to the university are also components of the regular workload for all faculty. All requirements for the Ph.D. in Geography or a cognate discipline, else in Computer Science or in Informatics with demonstrated relevance to spatial data and spatial analysis must be completed by August 2020.

Applications are accepted electronically at https://jobs.colorado.edu/jobs/JobDetail/?jobId=20553 and should include an application letter, a curriculum vitae, up to three relevant reprints of publications, evidence of teaching effectiveness, and 1-2 page statements of research and teaching plans. Also provide the names and e-mail addresses of three professional references. The search committee will solicit letters from these individuals. Applications received by 15 October 2019 will receive full consideration; and the review of applications will continue until the position is filled.

For further information and inquiries, please contact Professor Barbara Buttenfield (babs@colorado.edu).
