## From the Editor

Dear members, readers,

The issue you are reading is the last issue of this year. Hopefully we have completed nine years of continuous presence and are entering the 10th year.

During these nine years, we changed our image, tune, partners, but not our mood. The mood for the presentation of OSGeo's GeoForAll action has always been high and will remain so. The Editorial Team of the Newsletter always tried to have the form ready at the beginning of each month out of respect for the members of the action but also because a serious Publication has this as the face of the Publication in the outside world. We have tried to keep this face as bright as possible, and I would like to take this opportunity to thank the members of the Editorial Team for their consistency. We will keep this consistency for as many years as we continue to be at the services of the Newsletter.

I wish you, personally and on behalf of the Team, a Good, Happy, Healthy Year, better than the one that is about to leave. Happy Holidays.

Nikos Lambrinos, Chief Editor

#### **FDO Implementation Summit 'FAIR Digital Objects: From Theory to Practice', Berlin, March 20-21, 2024.**

Under the title '**FAIR Digital Objects: From Theory to Practice**' this event will focus on plans and developments and will also discuss relevant policy aspects. It will be preceded by a training day on March 19th. A Call for Papers is open with a deadline of 15 December, and registration will be opened in late November 2023.

3. The [event](#), '**The Ethics of AI and Data in Higher Education**', took place on 10 November 2023 and was hosted by the Association of African Universities ([AAU](#)), the University of Nottingham, and the Ethical Data Initiative ([EDI](#)). It was held as part of celebrations to mark Africa Universities' Day and the AAU's 56th anniversary - Focusing on Artificial Intelligence in Higher Education.

The three organisations have begun the [Campaign for Data Ethics in Education](#), to advocate for the inclusion of data ethics in all data science and research-based higher education courses, to train the next generation of data and research professionals about their legal and ethical responsibilities surrounding the use, reuse, and sharing of data.
